Sirs:

This package contains the completed CAIR report forms for those chemicals on which Lockheed Missiles and Space Company (LMSC) is reporting, as listed in the Chemical Substance Matrix, section 704.225 of the December 22, 1988, Federal Register. Of the substances listed, the only ones which LMSC uses and which are not clearly exempted from reporting, are Toluene Diisocyanates (TDI).

The seven reports being filed are for the following chemicals:

Conathane DPEN-8536 (two reports filed for the two EPA facilities within LMSC)

We have been notified by the supplier via the June 14 Federal Register listing. We are using this product at two different EPA facilities of LMSC, as indicated in the reports.

Eccofoam FPH

We have not received a letter from the supplier, but have verbal information that he is preparing a written notification.

Scotch Cast Brand Resin 221

We received no letter from the supplier, who has indicated that they did not notify us since they are no longer producing this material, but would have if they were still manufacturing it.

Stafoam P1100 Series, Component T (three reports filed for the three different densities of this product).

We received no letter from the supplier since that company is exempt from reporting because of the size of their business and the volume of TDI that they manufacture.

We are reporting to you for all of these chemicals, because we consider the intent of the regulation makes it appropriate to report, even though in three of the four cases there may be a technicality which might be construed as reason not to report.

This report is provided within the timeframe requested in our letter dated September 28, 1989, and which was re-sent on November 20, 1989. On December 19, 1989, we received telephone confirmation that this request had been granted.

1.01 This Comprehensive Assessment Information Rule (CAIR) Reporting Form has been completed in response to the Federal Register Notice of..... [1][2] [2][2] [8][3]  
CBI mo. day year

☐ a. If a Chemical Abstracts Service Number (CAS No.) is provided in the Federal Register, list the CAS No. .... [1][2][6][4][7][1]-[6][2]-[5]

b. If a chemical substance CAS No. is not provided in the Federal Register, list either (i) the chemical name, (ii) the mixture name, or (iii) the trade name of the chemical substance as provided in the Federal Register.

(i) Chemical name as listed in the rule ..... NA

(ii) Name of mixture as listed in the rule .... NA

(iii) Trade name as listed in the rule ..... NA

c. If a chemical category is provided in the Federal Register, report the name of the category as listed in the rule, the chemical substance CAS No. you are reporting on which falls under the listed category, and the chemical name of the substance you are reporting on which falls under the listed category.

## SECTION 7 MANUFACTURING AND PROCESSING INFORMATION

### General Instructions:

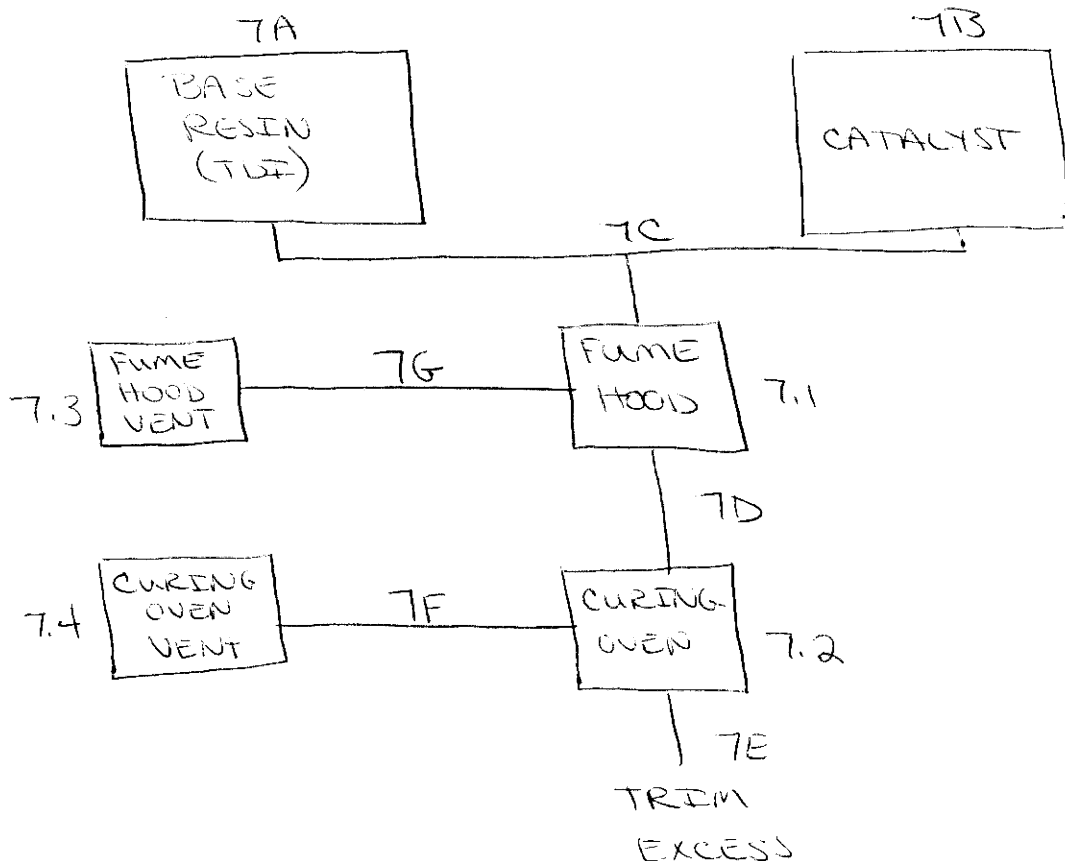

For questions 7.04-7.06, provide a separate response for each process block flow diagram provided in questions 7.01, 7.02, and 7.03. Identify the process type from which the information is extracted.

### PART A MANUFACTURING AND PROCESSING PROCESS TYPE DESCRIPTION

7.01 In accordance with the instructions, provide a process block flow diagram showing the major (greatest volume) process type involving the listed substance.

CBI

☐ Process type ..... foaming operation

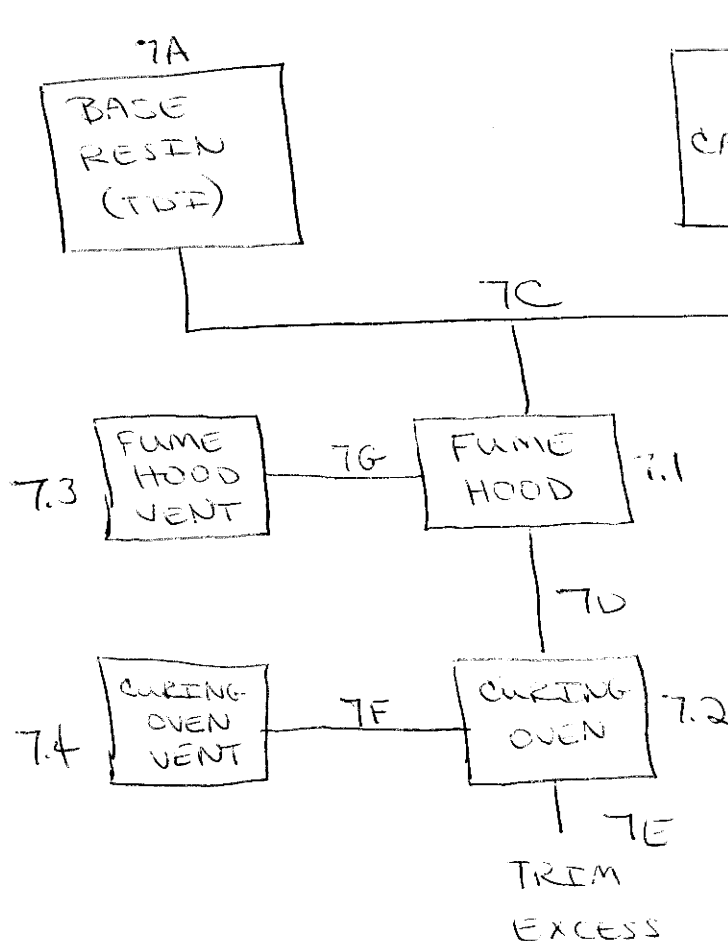

☐ Mark (X) this box if you attach a continuation sheet.

- 7.03 In accordance with the instructions, provide a process block flow diagram showing all process emission streams and emission points that contain the listed substance and which, if combined, would total at least 90 percent of all facility emissions if not treated before emission into the environment. If all such emissions are released from one process type, provide a process block flow diagram using the instructions for question 7.01. If all such emissions are released from more than one process type, provide a process block flow diagram showing each process type as a separate block.

**SECTION 8 RESIDUAL TREATMENT GENERATION, CHARACTERIZATION, TRANSPORTATION, AND MANAGEMENT**

---

**General Instructions:**

For questions 8.04-8.06, provide a separate response for each residual treatment block flow diagram provided in question 8.01, 8.02 or 8.03. Identify the process type from which the information is extracted.

For questions 8.05-8.33, the Stream Identification Codes are those process streams listed in either the Section 7 or Section 8 block flow diagrams which contain residuals for each applicable waste management method.

For questions 8.07-8.33, if residuals are combined before they are handled, list those Stream Identification Codes on the same line.

Questions 8.09-8.33 refer to the waste management activities involving the residuals identified in either the Section 7 or Section 8 block flow diagrams. Not all Stream Identification Codes used in the sample answers (e.g., for the incinerator questions) have corresponding process streams identified in the block flow diagram(s). These Stream Identification codes are for illustrative purposes only.

For questions 8.11-8.33, if you have provided the information requested on one of the EPA Office of Solid Waste surveys listed below within the three years prior to your reporting year, you may submit a copy or reasonable facsimile in lieu of answering those questions which the survey addresses. The applicable surveys are: (1) Hazardous Waste Treatment, Storage, Disposal, and Recycling Survey; (2) Hazardous Waste Generator Survey; or (3) Subtitle D Industrial Facility Mail Survey.

## SECTION 10 ENVIRONMENTAL RELEASE

---

### General Instructions:

Complete Part E (questions 10.23-10.35) for each non-routine release involving the listed substance that occurred during the reporting year. Report on all releases that are equal to or greater than the listed substance's reportable quantity value, RQ, unless the release is federally permitted as defined in 42 U.S.C. 9601, or is specifically excluded under the definition of release as defined in 40 CFR 302.3(22). Reportable quantities are codified in 40 CFR Part 302. If the listed substance is not a hazardous substance under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA) and, thus, does not have an RQ, then report releases that exceed 2,270 kg. If such a substance however, is designated as a CERCLA hazardous substance, then report those releases that are equal to or greater than the RQ. The facility may have answered these questions or similar questions under the Agency's Accidental Release Information Program and may already have this information readily available. Assign a number to each release and use this number throughout this part to identify the release. Releases over more than a 24-hour period are not single releases, i.e., the release of a chemical substance equal to or greater than an RQ must be reported as a separate release for each 24-hour period the release exceeds the RQ.

For questions 10.25-10.35, answer the questions for each release identified in question 10.23. Photocopy these questions and complete them separately for each release.

### Health Hazards (Acute and Chronic)

Vapors inhalation may cause severe irritation of respiratory tract. Prolonged exposure may cause pulmonary edema, chronic lung impairment. Liquid contact causes serious skin and eye burns.

Carcinogenicity:	NTP?	IARC Monographs?	OSHA Regulated?
	YES		

A national NTP program showed TDI to be carcinogenic when given to rats in max. tolerated doses. It was not carcinogenic in a 2 year inhalation study. TDI is included in the NTP

### Signs and Symptoms of Exposure

Difficult, labored breathing, asthma-like attacks in sensitive persons, severe irritation of skin, eye damage, or TDI sensitization.

### Medical Conditions

Generally Aggravated by Exposure Respiratory bronchial conditions. Skin sensitivity.

Emergency and First Aid Procedures Eyes: Flush with water 15 min. Get medical attention. Skin: Wash with plenty of soap & water. Remove contaminated clothing. Ingestion: Give plenty of water. DO NOT induce vomiting. Get medical attention. Inhalation: Move to fresh air. Give oxygen if necessary. Get medical attention.

## Section VII — Precautions for Safe Handling and Use

### Steps to Be Taken in Case Material is Released or Spilled

Clean up crew must full protective equipment. Absorb material with sawdust or sweeping compound. Decontaminate with mixture of 90% water, 8% concentrated ammonia, and 2% detergent. Shovel it into open top drums and remove to well ventilated area.

### Waste Disposal Method

Disposal of waste must be done in accordance with Federal, State and

Local environmental control regulations.

### Precautions to Be Taken in Handling and Storing

Store in tightly closed containers in dry cool places at temperatures between 70-90°F.

### Other Precautions

This product reacts with water & other substances generating CO<sub>2</sub> gas which will cause sealed containers to expand and possibly rupture. DO NOT reseal containers if contamination is suspected.

## Section VIII — Control Measures

Respiratory Protection (Society Type) Self-contained breathing apparatus, gas masks equipped with organic cartridges, masks with external air sources.

Ventilation	Local Exhaust	YES	Special Design exhaust systems accordingly.
	Mechanical (General)	YES

### Protective Gloves

Chemical resistant rubber or plastics

Eye Protection Fitted goggles or face shields and safety glasses.

### Other Protective Clothing or Equipment

Coveralls, boots, rubber aprons.

Work Hygienic Practices Do not eat, drink, or smoke in working areas. Keep clothing clean and equipment clean at all times.
